

Multipurpose Cylinder Wrench

This unique tool offers unique capabilities and is a spark free multipurpose wrench. One tool for removing tight cylinder caps, wrench for connecting both 1 1/8 and 1 1/4 sized CGA valve nuts, and indexed pins for opening and closing stubborn cylinder valves. This tool was designed specifically for use with cylinders; caps, CGA nuts and valves. This multipurpose wrench can make every change-out of cylinder gases safer, efficient and reliable.

Features

- CGA nut wrench – 1 1/8 sized (CGA 580, 320, 540, 350, 590, and many other CGAs)
- CGA nut wrench – 1 1/4 sized (CGA 660, 330)
- Cylinder cap wrench – Spanner hook to provide leverage on cap without damaging it or valve.
- Cylinder valve wrench – indexed pins for gripping cylinder valve. Fits most cylinder valves including portable cryogenic container valves (with use of two pins)
- Small acetylene wrench – Size MC, B cylinders

Materials of Construction

- Body:** Bronze Alloy
- Coating:** Proprietary non-spark

Specifications

- Wrench:** 1 1/8 and 1 1/4 combination open end
- Kit Includes:** Wrench body and 3 index pins
- Patent Numbers** 11,311,983 B2 and US D 932 855 S

OPTIONS: Tool available with anti-bacterial coating for medical, healthcare, clinical research and biopharma market segments.
